

**Position Description**  
**Program Manager Salary to 150K plus bonus! (all bonuses are paid quarterly)**

**Pre-requisite:**

- At least 10+ years of SAP Experience managing to end to end global implementations
- Has a good understanding of multiple technologies like Portal frameworks, Integration architectures etc.
- Experience in playing a role in the PMO organization
- Experience in SAP global deployment programs
- Experience in executing projects in a global delivery model

**Job Description:**

- SPoC from Wipro - Part of the PMO office – responsible for providing leadership to all SAP and surround technology projects
- Responsible and accountable for delivery of all projects / programs on time and on budget
- Engage with the customer leadership team and plan for the IT roadmap ahead – facilitate the discussions on technological advancement, implementation strategy and organizational change management
- Assume ownership on all issues at the PMO level and ensure timely resolution
- Lead and guide the project managers of each track to work in a synchronous fashion
- Engage with the project team members and resolve issues that are escalated higher up
- Constantly monitor and manage project scope – ensure that all scope changes go through the prescribed scope change control methodology
- Lead the governance council meetings at all the three levels – PMO, management committee and steering committee
- Identify and monitor all the risks – take mitigation actions and ensure the risks are under control
- Communicate periodically on the status of the projects and account to all stakeholders in Wipro and customer
